*Andrews knows how to:*

Software and Services for JD Edwards

Andrews helps clients install, upgrade, extend, and enhance all JD Edwards software. Andrews' JD Edwards specialists combine wide business experience with broad and deep technical knowledge.
Andrews has created two software products that enhance the JD Edwards experience:

RapidDecision provides the best business intelligence you can get. It does this by building a data warehouse very quickly and at very low cost. RapidDecision brings data warehouses within reach of all customers.

RapidReconciler ensures that JD Edwards Inventory and General Ledger stay in perfect harmony. It eliminates time-consuming month-end reconciliations.

Andrews' Custom Software specialists help clients extend and enhance their JDE software. They do this by combining a deep understanding of your JDE application along with solid knowledge of the latest technologies. This allows them to create elegant custom software that integrates seamlessly with your JDE applications.

Andrews explains technology in plain English.
We also keep things simple.

Services provided to JD Edwards customers

There are many ways in which Andrews can enhance your JD Edwards experience. These include:

- Helping clients who are new to JD Edwards to get started. Our track record for helping clients get started with JD Edwards is unrivalled.

- Upgrade assistance. Mature customers benefit greatly from expert assistance when upgrading to new releases.

- Extra hands. Many Andrews' clients need additional help from people with special skills. Our network of experts can provide the exact skills you need.

- Adding more capability. A steady stream of exciting new offerings is being provided by Oracle to JD Edwards customers.

- Technical advice and support. It is impractical for many organizations to maintain the deep technical skills needed to keep JD Edwards applications performing at their peak. Managing the CNC function can be daunting to some. Andrews can provide help as needed or can handle this function for you.

- Building the foundation for business intelligence. No other service provider has designed and implemented over a hundred successful full-function business intelligence solutions for JD Edwards customers.

- Retiring unnecessary customizations. Many installations include now-outdated and unnecessary changes to JD Edwards applications. Andrews can help retire them and get you back on track to keep up with new improvements.

- Leverage the web. Too often the outstanding capability of your JD Edwards software has not been made available to everyone that could use it including customers, all your employees, and suppliers. Andrews can leverage the capability of the Internet and wireless networks to extend JD Edwards functionality everywhere.

- Create custom applications. When custom code is needed, Andrews experts know how to build it rapidly using the most effective tools and applying standards and techniques that will limit the burden of maintaining and enhancing it over time.

Andrews Consulting

Be different. Stay ahead.

The software that most businesses use is a blend of packaged software and of custom software.

Andrews helps customers perfect this blend and provides custom software services. This software provides capabilities that supplement those of your packaged software. Often it can give you unique competitive advantages.

Creating custom software is a very challenging task, and failure rates are historically high. Andrews encourages clients to create custom software only when the need is legitimate and when they are willing to follow principles needed for success.

Andrews' clients have enjoyed significant success building applications as a result of:

- The unique process and principles Andrews applies to projects.
- The productivity and technical skills of our staff.
- Effective use of the best available tools and standards.

Andrews helps clients create highly-effective custom applications regardless of whether their packaged applications include JD Edwards. Development in either Java or Microsoft .NET is fully supported by our staff.
